FARAZ NAWAZ

ELECTRICAL & BIM ENGINEER

Technical Office | Site Supervision | BIM Coordination

Riyadh, Saudi Arabia | +966 55 167 9504 | faraznawaz2014@gmail.com

TRANSFERABLE IQAMA | VALID DRIVING LICENSE | AVAILABLE IMMEDIATELY

PROFESSIONAL PROFILE

Electrical Engineer with three years of Saudi experience spanning technical office deliverables and site execution across consultancy and contracting roles. Prepares electrical calculations, Revit MEP models, shop drawings and DIALux lighting studies; coordinates material reviews, installation supervision, inspections and WIR/RFI documentation. Project exposure includes the Commercial Court, REGA, South Dhahran Home Ownership and Al-Qaa Housing.

CORE TECHNICAL EXPERTISE

Electrical | LV/MV distribution layouts, load calculations, panel schedules, single-line diagrams, power, lighting and containment.

BIM and lighting | Revit MEP electrical modeling, Navisworks clash detection, multidisciplinary coordination and DIALux lux calculations.

Technical office and quality | Shop drawings; material submittals; bills of quantities (BOQ); Work Inspection Requests (WIR); Requests for Information (RFI); Inspection and Test Plans (ITP); as-builts.

PROFESSIONAL EXPERIENCE

Electrical Engineer - Design, QA/QC and Site Coordination

Basmat Al-Riyada Engineering Consultancy | Riyadh, Saudi Arabia

OCT 2025 - SEP 2026

Technical office and BIM

- Prepared LV/MV distribution, internal and external lighting, and ELV layouts against project specifications and applicable SBC/IEC requirements.
- Developed load calculations, panel schedules and single-line diagrams to support electrical design packages.
- Modeled electrical systems in Revit MEP; identified clashes in Navisworks and coordinated routing changes with mechanical and architectural teams.
- Prepared AutoCAD shop drawings, containment routes and schematics for electrical installation teams.
- Performed DIALux simulations and lux calculations to assess lighting layouts against project targets.
- Reviewed material submittals and vendor datasheets against design requirements and project specifications.

Site inspections and coordination

- Inspected electrical installations, coordinated inspection documentation and worked with project teams to resolve site discrepancies.

PROJECTS AT BASMAT AL RIYADA

Government: Commercial Court; Real Estate General Authority (REGA).

Residential: Jasmin Residential; Junoub Villa; Al Yarmouk Residential.

Other assignments: Starlink Warehouse; Fenchurch Network.

PROFESSIONAL EXPERIENCE CONTINUED

Electrical and Fire Alarm Site Engineer

Fawzi Saleh Al-Najrani Co. | Khobar, Saudi Arabia

AUG 2024 - JUL 2025

South Dhahran Home Ownership Project

Site execution and supervision

- Supervised installation of LV mains, branch circuits, architectural lighting and fire alarm systems against approved shop drawings and specifications.
- Coordinated subcontractor activities and material deliveries; tracked daily productivity against construction milestones.
- Checked installation quality and compliance with project QA/QC and HSE requirements before consultant inspections.

Technical office and inspection records

- Prepared WIR documentation for consultant review and coordinated RFIs to resolve field design queries.
- Liaised with consultants and installation teams on approvals and site technical issues.

Electrical Engineer - ELV Systems

Saleh Zuhair Al-Shamrani Holding Co. | Khobar, Saudi Arabia

AUG 2023 - JUL 2024

Al-Qaa Housing Project | Qunfudhah, Saudi Arabia

Site installation and testing support

- Coordinated installation of structured cabling, data networks, CCTV and biometric access control systems.
- Coordinated technician activities for cable routing, containment and distribution rack layouts across service zones.
- Supported pre-commissioning checks, continuity testing and commissioning of network outlets and active equipment.

Technical documentation and handover

- Prepared site reports, field records and as-built drawings for project closeout.

SOFTWARE AND SYSTEMS

Autodesk Revit MEP | Navisworks | AutoCAD | DIALux | Microsoft Excel and Word

Systems: Power distribution, lighting, fire alarm, structured cabling, CCTV, access control and data networks.

CODES AND STANDARDS

Project exposure: Saudi Building Code (SBC) and IEC requirements for electrical layouts, material reviews and site inspections.

Relevant reference frameworks for Saudi building and MEP projects, subject to the contract and authority having jurisdiction:

Saudi requirements: SBC 401 (electrical); SBC 601/602 (energy conservation); SBC 801 (fire protection); Saudi Electricity Company (SEC) SDCS/SDMS standards and service requirements; applicable SASO standards and Civil Defense requirements.

Power and installations: IEC 60364 (LV installations and verification); IEC 61439 (LV assemblies); IEC 60947/60898 (switchgear and breakers); IEC 60502 (power cables); IEC 60076 (transformers); IEC 62271 (MV/HV switchgear); IEC 60529 (IP ratings).

Earthing and containment: IEC 60364-5-54, IEC 62305 (lightning protection), IEC 61643 (surge protection), BS 7430 (protective earthing), IEC 61386 (conduits) and IEC 61537 (cable trays).

Fire and standby power: NFPA 70 (NEC), NFPA 72 (fire alarm), NFPA 101 (life safety) and NFPA 110/111 (emergency and standby power), where specified.

Lighting and ELV: EN 12464-1/-2 (workplace lighting); EN 13201/CIE 115 (road lighting); IEC 60598 (luminaires); ANSI/TIA-568, 569, 606 and 607 (structured cabling, pathways, administration and bonding).

EDUCATION

Bachelor of Science in Electrical Engineering | University of Engineering and Technology, Peshawar, Pakistan | 2019 - 2023

PROFESSIONAL REGISTRATION AND TRAINING

Pakistan Engineering Council (PEC) | Registered Engineer | Registration No. ELECT/I05194 | 2024

Project Management Virtual Internship Certificate | Excelerate / Saint Louis University | 2025
