PROFESSIONAL SUMMARY

Electrical Engineer with GCC experience in LV, MV and ELV design, QA/QC and site execution across government, commercial and residential projects, including the Commercial Court and Real Estate General Authority (REGA). Delivers code-compliant electrical packages covering load calculations, single line diagrams, panel schedules, AutoCAD shop drawings, Revit MEP models and Dialux lighting designs to SBC and IEC standards. Bridges the design office and the site through material submittals, WIR and RFI workflows, and close coordination with consultants and contractors.

CORE SKILLS

Power Systems: LV and MV Distribution, Load Calculations, Panel Sizing, Single Line Diagrams (SLD)

ELV and Data Networks: Structured Cabling, Data Networks, CCTV, Access Control, Fire Alarm Systems

Lighting Design: Dialux Simulation, Lux Calculations

Technical Office: Shop Drawings, Material Submittals, BOQ Review, RFIs

Site Management: Installation Supervision, Site Coordination, QA/QC Inspections (WIR, ITP)

BIM: 3D Electrical Modeling in Revit MEP, Clash Detection in Navisworks

Software: AutoCAD, Autodesk Revit MEP, Navisworks, Dialux, MS Office (Excel, Word)

Codes and Standards: SBC, IEC

PROFESSIONAL EXPERIENCE

Electrical Engineer – Design, QA/QC and Site Coordination

Oct 2025 – Sep 2026

Basmat Al-Riyada Engineering Consultancy, Riyadh, KSA

- Designed LV and MV power distribution, internal and external lighting, and ELV layouts for government, commercial and residential projects in line with SBC and IEC.
- Prepared load calculations, panel schedule sizing and safety factor evaluations for LV and MV distribution.
- Built 3D electrical models in Revit MEP and ran multi-discipline clash detection in Navisworks, resolving conflicts with mechanical and architectural trades before construction.
- Produced and optimized AutoCAD drawings including single line diagrams (SLD), containment paths, and schematic layouts.
- Ran Dialux lighting simulations and lux calculations to meet client requirements and lux targets.
- Reviewed material submittals, vendor datasheets, and compliance records against project specifications.
- Inspected site installations, resolved design discrepancies, and issued approved Work Inspection Requests (WIR).

Key Projects:

Government: Commercial Court Project; Real Estate General Authority (REGA)

Residential: Jasmin Residential Project; Junoub Villa; Al Yarmouk Residential Project

Warehouse: Starlink Warehouse Project

Other: Fenchurch Network

Electrical and Fire Alarm Site Engineer

Aug 2024 – Jul 2025

Fawzi Saleh Al-Najrani Co., Khobar, KSA

- Supervised contractor teams installing LV power mains, branch circuits, architectural lighting, and life-safety fire alarm systems.
- Enforced adherence to approved shop drawings, technical specifications, QA/QC requirements, and HSE regulations.
- Tracked daily site productivity, coordinated material deliveries, and supervised subcontractors to maintain project milestones.
- Initiated formal inspections and compiled Work Inspection Requests (WIR) for consultant review.
- Liaised with consultants for approvals and closed field design issues through technical Requests for Information (RFI).

Key Project: South Dhahran Home Ownership Project

Electrical Engineer – ELV Systems **Aug 2023 – Jul 2024**

Saleh Zuhair Al-Shamrani Holding Co., Khobar, KSA

- Coordinated field installation of ELV systems including multi-node data networks, structured cabling backbones, CCTV, and biometric access control.
- Managed technician layouts for routing, containment paths, distribution racks, and cable tray paths across service zones.
- Supported pre-commissioning testing, continuity validation, and final commissioning of network drops and active hardware.
- Prepared technical site summaries, field logs, and as-built drawings for project closeout.

Key Project: Al-Qaa Housing Project, Qunfudhah

EDUCATION

Bachelor of Science in Electrical Engineering **2019 – 2023**

University of Engineering and Technology, Peshawar, Pakistan

CERTIFICATIONS AND MEMBERSHIPS

- Registered Engineer, Pakistan Engineering Council (PEC), Reg. No. ELECT/I05194 (2024)
- Project Management Virtual Internship Certificate, Excelerate / Saint Louis University (2025)
